What did our attendees like most about the 2019 CEMC FINTECH INNOVATION SUMMIT?

Speakers and Content

- 
- Appreciated the mix of innovation and with the focus on heavy equipment and finance industries. Created a vision of what is possible.
 - Speakers who are passionate about their work with a greater purpose in mind.
 - Session content not seen and/or available at traditional ('old') structured association conferences.
 - The wide array of speakers is what I think differentiates this summit from others.
 - Energizing speakers and an attendee group that was from diverse platforms. It was not the same conversations with the same people which made for more impactful time spent. Sli.do was awesome too. Great to have actual questions answered in real-time.
 - A fresh approach to the issues and good content and delivery from speakers.
 - Ruly innovative topics and engaging speakers.

Networking

Many of the right people in equipment and equipment financing that **are good potential partners for our business.**

The overall experience was wonderful. **The atmosphere encouraged many to engage and share philosophies about success.**

I like **the intimate network of executives.**

Community

It was a very inspiring event with amazing views and collection of people. I love hearing people's stories and how they succeeded and I love listening to how people disrupted their industry.

Smaller and more intimate than other conferences.

Environment to think outside of our normal day to day routines plus awareness of new tech initiatives/accomplishments.
